DeskCharm

A little charm for your desktop that keeps you calm, watered and smiling. Windows · v1.6.0 · free beta

WHAT IT IS

A physics charm (nazar, temple bell, Ganesha and more) hangs on your screen. Drag, fling and squeeze it. Friendly visitors drop by, like **Vijay the water buddy**, and festivals (Diwali, Holi, Pongal, Christmas) decorate your desk on the day.

WHY IT MATTERS

Desk workers sit for hours and forget water, breaks and breathing. Most break apps are cold timers that get muted. DeskCharm leads with **culture and delight**, so people keep it on, and then quietly helps with **breaks, posture, water, breathing, mood, focus and reminders**, staying quiet during meetings. Insights show your week kindly.

PRIVATE BY DESIGN

Everything stays on your PC. No account, no tracking. Only exceptions: the update check, and opt-in weather and calendar.
